Dimensions shown in (millimeters) and inches.

KenCast™

Road Rehabilitation takes your tooling equipment through rough conditions

KenCast parts are unique because no one makes wear parts like Kennametal. These extremely durable wear-resistant parts are manufactured in our own foundry.

Your equipment runs in abrasive conditions. Protect your investment with Kennametal KenCast composite material. It combines the exceptional wear resistance of Kennametal cemented tungsten carbide with the toughness and practicality of air-hardened steel.

Use KenCast parts on:

Reclamation Equipment

- Pedestal protectors
- Side cleaner bars

Road Planing Equipment

- Kicker plates
- Drag shoes
- Quick-change block-base protectors

Trenching Equipment

- Base segment protection

KenCast Parts Are:

- Easier to apply and tougher than brazed-on solid carbide tiles.
- Longer lasting and easier to apply than hardfacing material.
- More wear resistant than standard or AR-type steels.
- Better at protecting the carbide particles than embedded weld overlays.
